

## APPLICATIONS

Most types of products are stored in bins, hoppers, or silos before transfer to a mixer or a transport vehicle and using a weighing system enables accurate monitoring and management of the product while in the bin or silo.

- Stock Control
- Automated and Manual Truck or Rail Loading
- Ticketing Operations Available
- Continuous Feeding Controls for Plant Process

## FEATURES

- **Trade-Approved** or Non-Trade Designs
- Capacities from 50kg to 1,000t
- Fully Electronic Loadcell Installation
- Locally Mounted Digital Indicator
- Large 75mm Liquid Crystal (Black) Display
- Weatherproof Installation.
- 240VAC or 12VDC Operation
- System Can be Installed by the Client, if Required

## RETROFITTING

Existing hoppers and silos can be retrofitted with loadcell kits to convert them in to a weighing system.

## OPTIONS

- Remote Digital Indicator
- Ability to Upgrade from Manual to Automatic Operation (Completely Computer and Software Controlled)
